

Access Reader

ID ACCESS 2500

PRODUCT DESCRIPTION

The ID ACCESS 2500 access reader is an RFID reader specially developed for use in access control. It supports the common Wiegand and RS485 output interfaces and can be easily integrated into existing access systems.

In addition to reading card numbers, the ID ACCESS 2500 also allows read and write operations on MIFARE cards and the processing of APDU commands, which also enables its use with CPU cards.

For authentication, the reader offers PSAM card support, making it particularly suitable for security-critical applications. The ID ACCESS 2500 is the optimal solution for modern access control systems in commercial, industrial, or institutional applications.
